PROFESSIONAL SUMMARY

- Software engineer experienced in building backends with RESTful APIs, responsive web applications and understanding of DevOps practices. Prepared to quickly learn and apply new technologies to support evolving project needs and contribute to effective software solutions.

WORK EXPERIENCE

Associate Software Engineer

Dec 2024 - Jun 2025

Syntronics Systems | Tamilnadu, India

- Developed & enhanced **ICare CRM**, a modular platform for hotel & restaurant clients. Built multi-tenant architecture for scalable customer data storage, personalized/bulk messaging (WhatsApp, SMS, Email).
- Engineered a **background worker & queue system** to process bulk emails every 5 mins, decoupling frontend and improving UX.
- Investigated and Resolved **critical email deliverability issues** (DMARC/domain blacklisting) and used Mailjet API as a solution.
- **Devised** a reliable workaround by configuring internal **domain-based emails** restoring email deliverability by 100%.
- Built a **custom internal dashboard** to log and display catering **enquiries** in real-time, ensuring no enquiry is lost—incase if email delivery fails.
- Created an **intuitive control panel** for non-technical clients to update sliders, images, menus and dynamic outlet timings, improving operational efficiency by 80%.

Web Developer Trainee

May 2024 - Oct 2024

Oneyes Infotech | Tamilnadu, India

- **Developed a web application** for tracking company performance metrics using **key performance indicators (KPIs)** displayed through **interactive graphs, charts, and tables** to a company of 50 -100 members.
- Developed a comprehensive **authentication** module with **Email OTP** system, forget password, strengthening account security.
- **Built RESTful API endpoints** to improve accessibility and usability of frontend applications and **secured credentials** with **.env** and **.gitignore** maintaining version control as well.
