Sulaiman Alfareeth

Software / Full stack Developer

+91 7339219817 | Personal Website | Github : oldstone7 | sulaimanalfareeth@gmail.com

PROFESSIONAL SUMMARY

Full-stack developer skilled in React, Next.js, Node.js, Django, Flask, and FastAPI with strong knowledge in SQL Databases. Experienced in building SaaS platforms, AI-powered applications, and web apps. Focused on delivering production-ready software with clean documentation and understands DevOps procedures.

WORK EXPERIENCE

Associate Software Engineer   Dec 2024 - Jun 2025

Syntronics Systems | Tamilnadu, India

- Developed & enhanced **ICare CRM**, a modular platform for hotel & restaurant clients. Built multi-tenant architecture for scalable customer data storage, personalized/bulk messaging (WhatsApp, SMS, Email) and dashboards.
- Engineered a **background worker & queue system** to process bulk emails every 5 mins as **cron** jobs, decoupling frontend and improving UX.
- Investigated and resolved **critical email deliverability issues** (DMARC/domain blacklisting) and **devised** a reliable workaround restoring email deliverability by 100%.
- Built a **custom internal dashboard** to log and display catering **enquiries** in real-time, ensuring no enquiry is lost—incase if email delivery fails.
- Created an **intuitive control panel** for non-technical clients to update sliders, images, menus and dynamic outlet timings, improving operational efficiency by 80%.

Web Developer Trainee   May 2024 - Oct 2024

Oneyes Infotech | Tamilnadu, India

- **Developed a web application** for tracking company performance metrics using **KPIs** displayed through **interactive graphs, charts, and tables** to a company of 50 -100 members.

SKILLS

Frontend: React, Tailwind CSS, Next.js, TypeScript, React Native, Flutter
Backend: JavaScript, Node.js, Python, FastAPI, Flask, Django, REST API, PHP
Databases: MySQL, PostgreSQL, Mongo DB
Tools & DevOps: Git, Version Control, Web Hosting, Docker, cPanel, Postman
Soft Skills: Communication, Leadership, Problem Solving, Teamwork, Quick Learner, Teaching

EDUCATION

Bachelor of Engineering - Computer Science   Aug 2020 - May 2024
8.1 CGPA
SCAD College of Engineering and Technology , Tirunelveli

PROJECTS (Click project titles for live links)

Smart Todo AI (Next.js, Tailwind CSS, Django, Google's Gemini API, PostgreSQL)   View in GitHub

- Created AI-powered task management app delivering context-aware recommendations, task prioritization scoring, and personalized advice.

CalendarBot (Python FastAPI, Streamlit, LangChain, Google's gemini API)   View in GitHub

- Built an AI-powered conversational assistant for Google Calendar, handles scheduling, rescheduling, and managing events on your calendar.

Video Overlay Streamer (React, Flask, MongoDB, FFmpeg, Mediamtx)   View in GitHub

- Developed an RTSP video streamer with customizable overlays, presets, and dynamic text/logos for overlay streaming.

AdmyBrand SaaS (Next.js, TypeScript, Tailwind CSS)   View in GitHub

- Built an AI-powered marketing SaaS platform with scalable UI components and dynamic features using modern frontend stack.

More projects (Player tracking ML, SmallTalk, Gamestore**)**   View in GitHub

Video Overlay Streamer (React, Flask, MongoDB, FFmpeg, Mediamtx)   View in GitHub

- Developed an RTSP video streamer with customizable overlays, presets, and dynamic text/logos for overlay streaming.

AdmyBrand SaaS (Next.js, TypeScript, Tailwind CSS)   View in GitHub

- Built an AI-powered marketing SaaS platform with scalable UI components and dynamic features using modern frontend stack.
